EXPERIENCE

Consumatech, SA - Pretoria — Software Engineer (full time)

JANUARY 2021 - JANUARY 2022

- ➜ Designed, developed and implemented software applications that satisfy complex and core business requirements.
- ➜ Converted mockups and designs and no-code apps into sleek responsive frontend pages using ReactJs/Redux.
- ➜ Coordinated with backend developers and assisted in implementation to the NodeJs backend.
- ➜ Lead daily standups and ensure deliverable timelines.
- ➜ Coordinated closely with the UI/UX designer and QA
- ➜ Reviewed my peers deliverables with respect to the best practices and app optimization

Sketchish, India — *Frontend developer (Upwork contract)*

NOVEMBER 2020 - JANUARY 2021

- ➜ Converted designs into responsive frontend pages using MaterialUI and Antd. Programmed with Javascript / GIT and used React/Redux
- ➜ Maintained the existing project
- ➜ Refactored an existing codebase to improve efficiency and ease-of-use.
- ➜ Improved a real-time chat system, and other complex features

Andela, Rw - Kigali — Full-stack Software Engineer (full time)

JANUARY 2020 - JUNE 2020

- ➜ Written RESTful API in NodeJs using Express, PostgreSQL.
- ➜ Tested features with Jasmine, Mocha and Chai
- ➜ Executed React/Redux frontend in ES6, with Babel, Webpack and Node
- ➜ Coordinated closely with UI/UX designer
- ➜ Reviewed code for quality, finding weakness and ensuring adherence to standards
- ➜ Worked as part of a team involved in high complexity source code development.
